- Heroku/Zeit

RECENT PROJECTS

wtfshouldicook.com — github.com/reifnotreef/wtfshouldicook

- Web app for discovering recipes submitted by users
- Utilized Node, React and webpack on the front end
- Deployed an express server with a PostgreSQL database
- Implemented a RESTful API for interacting with the recipe database

manageLazily.com — github.com/reifnotreef/manageLazily

- Project Management app focused on small business and industrial companies
- Deployed a fullstack project using React and Firebase
- Implemented custom user creation via Cloud Functions
- Integrated CI/CD via Firebase and Github
- Followed TDD via Cypress

EXPERIENCE

Thinkful - Remote — [Engineering Immersion Apprentice](#)

SEP 2019 - PRESENT

- Strengthened my knowledge of the latest Javascript techniques using React, Node, and Express
- Expanded my knowledge of backend technologies by incorporating Postgres databases, and servers using Heroku and Google Firebase

Freelance Development - Irving, TX — [Fullstack Developer](#)

March 2016 - PRESENT

- Deployed Fullstack applications for multiple clients using a React Front-End styled with Bootstrap or Material-UI
- Utilized PostgreSQL and Google Firebase noSQL databases
- Followed client design and improved upon UX using a mobile-first responsive layout

Cork & Pig - Irving, TX — [Server](#)

May 2019 - Aug 2019

- Worked in a very fast-paced environment while being able to efficiently manage sections and multitask while upselling weekly and nightly specials
- Upheld restaurant brand by providing fast and courteous service to all guests
- Participated as an excellent team member by consistently exceeding sales goals
